HALO OVERVIEW

# CLIENT: Halo

## Event flyer

- HaloDashboard**  
Stay in control with full visibility of your teams, tasks, incidents and locations with instant sharing and updates.
- HaloApp**  
Create, share and update incidents and tasks in-real time with our user friendly, award winning app.

### Powerful Features

- HaloControl**  
Real-time incident management that allows you to **lead with intelligence**.
- HaloTask**  
Our time-tracked tasking module allows you to **stay on top of tasks lists**, even when offline.
- HaloLocate**  
Use our powerful mapping tools to filter data by location, zone, team, **find incidents and people quickly** to maximise your response.
- HaloEngage**  
Using our custom form builder, create a link to any data capture process and connect it to any dashboard. Using QR codes, Linktr.ee, or even a URL in a WhatsApp chat, anyone outside of Halo can now **send the right data, to the right people, in the right places**.
- HaloFusion**  
Share information across teams to **encourage collaboration that improves performance**.
- Multi-Dash Mode**  
**Manage multiple operations** and logs at once with our powerful multi-dashboard mode.
- Reports & Analytics**  
Export data that allows you to **build resilience** with custom log reports and analytics.
- Document Library**  
Provide instant-access resources to **boost staff confidence and productivity**.

“ Halo’s user-friendly appearance and ability to ensure all our safety & security management is streamlined into one place is a huge reason for us choosing Halo over other platforms. We run our site security program to the highest possible standard, and the reporting capabilities of Halo help us to manage and audit all incidents, tasks, patrols and activities continuously all within one, easy-to-use platform.”

**Bakary Bah**  
Senior Security Manager,  
OCS Group  
Chelsea Football Club

#### An Award Winning System

**Join the dots with Halo**  
Connecting people, places & information

**Why Safety Operations should be rising up your agenda**  
Increasingly safety and security considerations are impacting both university selection and student experience. Universities need to take action to deliver solutions in this specialist field to reassure their staff and students.

- >2.4m** Staff and students in the UK who need to be kept safe!
- 15.8%** Of students & parents see security as a key criteria for university selection
- 1/3** Of students become a victim of crime!
- 71%** Of female students don't think campus security keeps them safe
- 39%** Of students experience a decline in mental health!
- 68%** Of students don't think campus security keeps them safe!

**Remote R&D Facilities**  
Ensure checks happen to protect people in remote locations with Halo Task Manager

**Student Wellbeing**  
Quality and efficiency: Deploy team members to the places where they are needed with the Halo Mobile App

**Lone workers**  
Empower students and staff to report incidents and concerns with Halo Public Reporting

**Freedom of Speech**  
Manage, track and report on events and protests with Halo Incident Manager. And safety process intelligence with Halo Building Guard

**Campus Security**  
Promote best practice in your security operations with Halo Incident Manager

**Health and Safety**  
Set up and track routine tasks to ensure high risk areas are checked, validated and reported on with Halo Task Manager. Specify and capture bespoke data with Halo Custom Form Builder

Use exact map locations give us to increase efficiency in deployment of people

By digitally transforming your safety operations, Halo offers a whole university approach by connecting the right information to the right people at the right time.

**Halo**

**1 Student safety is increasingly becoming a key criterion for young people choosing a university**

With around a third of all students likely to become a victim of crime during their time at university, it's easy to see why almost 16% of all students and parents see security as a key criterion for university selection. The likelihood is that this will go up and not down over time.

This adds a new dimension to the student prospectus

The challenge lies in being able to produce evidence of security-based metrics to compelling messages to students. Often assesses rely on a variety of tools and requires bringing lots of data sets together in an integrated, powerful reporting way, this can be time-consuming, analise, and might not be as accurate as a time to re-think the way safety and operations are managed. Digitally the way this is approached by using a specialist incident management platform, integrated, powerful reporting is can help. The right solution would provide with the insights on operational level and the statistics their colleagues develop student acquisition messaging, uses students and their parents that security covered.

**2 5 reasons why you might want to re-think your security operations**

Is your security strategy ready for a new context?

Security operations, in many cases, rely largely on processes that sit across multiple communication channels that are not joined up. This means security leads face challenges in creating a whole university approach both in terms of delivery of the service and inputting to the strategic agenda.

We've put together a few points that we believe security leads in Higher Education environments might want to think about.

**3 Today, student safety is not just about incidents or crime**

A staggering 39% of students state they experience a decline in mental health whilst at university. This is a clear indication that student wellbeing needs to be on the agenda of safety and security teams across campus.

This will involve both reactive and proactive measures.

Should there be a wellbeing related episode, safety and security teams will need to reactively respond to the situation. They will be at the front line, needing to quickly and effectively report details in a factual, non-emotional way whilst still delivering an empathetic response to the individual involved. Those in the decision-making chair may need to be able to bring the right specialist teams into the process as soon and as efficiently as possible.

However, processes can be put in place to help mitigate the risk of such incidents occurring by having a proactive approach to student welfare checks.

Having the ability to manage routine tasks to support student wellbeing such as regular inspections, checking out accommodation and including things like lighting or security locks etc - ensures visibility at specific times and places in the same platform as incident management activities. This should also be a key consideration. It will help security leads to drive resource efficiencies and easily create incident reports from routine task activities, combining and considering more activities so they can be done simultaneously and to everyone's benefit.
